PIPELINER & NEW PIPELINER GLOBE'S SPECIAL ABRASIVES TOOLS IN OIL & GAS INDUSTRY

PIPELINER

NEW PIPELINER

YOUR ABRASIVE PARTNER FOR OIL & GAS INDUSTRY

For more than 40 years GLOBE is present in OIL & GAS industry with specific abrasive products for general and specialized applications. GLOBE offers a complete range of products for every kind of OIL & GAS application such as pipelines constructions, onshore and offshore installations, pipes and vessels manufacturing, maintenance and overhauling. Starting the distribution of abrasives in U.S. and Canadian oil extraction and refining plants during the late 60's, GLOBE extended its market to North Sea plants and more recently in all the Persian Gulf countries (GCC) building up a wide know-how and high specialization in dedicated solutions.

CUTTING

NOTCHING PREPARATION WHEELS

TYPE 42

DEPRESSED CENTER WHEELS FOR CUTTING PIPELINES

WORKABLE MATERIALS:

Steel and stainless steel

Stainless steel (Fe, S, Cl free)

DIAMETERS (mm): 115 - 125 - 150 - 180

THICKNESS (mm): 2,5 - 3,5 - 4,2

PIPELINER

PIPELINER is the cutting, grinding and beveling range designed for pipes fitting, notching and welding preparation. These discs are specially conceived and reinforced for grinding joint welds between passes in pipeline construction. Free from iron, sulphur or chlorine (Fe, S, Cl), they do not contaminate stainless steel. For more than 40 years GLOBE is supplying the OIL & GAS industry with specific abrasive products for general and special applications. GLOBE offers a full range of products for every kind of OIL & GAS applications such as pipelines constructions, onshore and offshore installations, pipe and vessel manufacturing, maintenance and overhauling.

- Intermittent light grinding, facing, beveling
- Pipeline - beveling, light grinding, notching and cleaning weld beads
- Pipes fitting and welding preparation

MAIN ADVANTAGES OF PIPELINER

- Outstanding performance in pipeline construction
- Long durability
- Cost saving

OVER NOTCHING AND WELDING PREPARATION

TYPE 41

FLAT WHEELS FOR CUTTING AND GRINDING PIPELINES

WORKABLE MATERIALS:

Steel and stainless steel

DIAMETERS (mm): 115 - 125 - 150 - 180

THICKNESS (mm): 4,0 - 4,5

NEW PIPELINER

PATENTED

The **NEW PIPELINER** is our latest innovation for Oil & Gas industry, developed for pipes fitting, notching and welding preparation. It features a patented double grooved surface on both sides which makes it very fast creating an efficient air circulation that cools the metal preventing overheating. The flat shape combined with the double grooved sides allow to penetrate more deeply into the piece.

- Intermittent light grinding, facing, beveling
- Pipeline - beveling, light grinding, notching and cleaning weld beads
- Pipes fitting and welding preparation
- Extremely fast. Cold grinding

MAIN ADVANTAGES OF NEW PIPELINER

- Specifically designed for pipeline construction
- Deeper cut
- Long durability
- Double grooved surface
- Cost saving
